

WP 1308

HULL & WATERLINE CLEANER

For removing brown staining and scale from fiberglass and painted boat hulls.

BENEFITS

- High acid content dissolves scale formations rapidly.
- Non-fuming
- Will dissolve crustacean shells commonly found on hulls, prop shafts and propellers.
- Biodegradable and environmentally friendly.

PRODUCT SIZES

- 1 Litre

DESCRIPTION

Hull and Waterline Cleaner has been specially formulated to remove brown staining and scale from boat hulls.

It can also be used to remove barnacles etc from stern gear on boats as well as from propellers.

Unlike other traditional cleaners and descaler this non-fuming acid mix it is easy to use by brushing or dipping with no concern for breathing in harmful vapours.

As it is a synergistic mix of organic compounds and Phosphoric Acid, once used they are neutralised readily degrade to their salts leaving no harmful compounds.

INSTRUCTIONS FOR USE

Do not dilute.

Apply by brush to the affected area, leave for a minute or two depending on the severity of discolouration and scale. When a satisfactory result shows, rinse off and allow to dry.

NB. The stronger the solution being used, the faster the reaction will be. When effervescence stops then the solution is spent.

HEALTH & SAFETY

Hazard pictogram (CLP):

Hazard statements (CLP):

H290 – May be corrosive to metals.
H314 – Causes severe skin burns and eye damage.

PHYSICAL PROPERTIES

Colour: Green.

Appearance: Green liquid.

Odour: mild.

Solubility: soluble in water.

Boiling point: >100°C.

Flash point: No data available.

Flammability: Non-flammable.

Density: ~1.4.

pH: <2.
